August 2nd, 2021

With great pleasure, I'm writing this letter of reference for Mr. Mark Villondo. I have had the pleasure of overseeing Mr. Villondo's development over the past three months. I can state with confidence that he is a motivated and responsible individual with a high degree of integrity. As such, I expect he will be a positive addition to your organization.

As the founder of Atreya Digital Health LLC, I feel Mr. Villondo will be an excellent UI/UX designer for any startup or larger organization that wants user friendly design. He started working as a remote intern helping my company from May 2021 during the middle of the coronavirus pandemic. In this role, he had a considerable amount of responsibilities and he handled them effortlessly. He had the skills to develop a high quality homepage, landing pages and HTML/CSS designs for my company. Due to his hard work, my company now has a user-friendly website.

Mark informed me about his wish to work in your organization as a UI/UX designer and utilize his skills for larger projects. I feel upon observation that he has an interest to excel in this field and in your organization he can perform and reach new heights.

I hope you give his job application a favorable consideration. If you need further information, please do not hesitate to call me.

Regards,

*Mishal Avichal, CEO*
